

*Immune Assist Micron* <sup>®</sup>

*Clinically Proven*

U.S. Patent 7407795 and other Patents Pending

***Immune System Dysfunction Is The Greatest Health Threat in Western Societies Today!***

Our immune system's inability to correctly identify and destroy the aberrant cells and biological invaders that attack us every day puts us at increased risk for serious illness. Now you can enhance your immune function naturally! ***Immune Assist Micron*** <sup>™</sup> is the most technologically advanced and cost effective immune system enhancement yet developed!

**Ingredients:**

***Immune Assist Micron*** <sup>™</sup> is a combination of over 200 highly purified, immunologically active, bio-available hetero-polysaccharides and 1,3-1,6 beta glucan compounds, which are concentrated and purified from six pure, all organic non-GMO medicinal mushroom species:

*Agaricus blazei\* Cordyceps sinensis \* Grifola frondosa\* Ganoderma lucidum\* Coriolus [Trametes] versicolor\* Lentinula edodes*

- Guaranteed 100% USDA and EU Certified Organic
- Guaranteed 100% Certified Kosher
- Guaranteed 100% Vegetarian ó Grown under Strict Laboratory Conditions
- Guaranteed to be 100% American Made in FDA registered biotech facility
- Available in bulk for custom formulations
- 50% water soluble, 50% micronized to less than 40 microns for immediate absorption

**"Guaranteed Authentic" *Immune Assist Micron* <sup>™</sup> – 100% Made in America!**

**Aloha Medicinals Inc.**

Carson City, NV 89706 USA Tel: +1.775.886.6300

## *Immune Assist Micron Î*

**Clinically Proven**

**U.S. Patent 7407795 and other Patents Pending**

**Immune Assist Micron™** is the most technologically advanced immune ingredient for use in dietary supplements available today. Research in yeast beta glucans uncovered the great potential for immune enhancers, but problems with their absorption, breakdown and deactivation of the yeast beta glucans by stomach acid, as well as their limited bioavailability in humans, reduced the potential offered by this amazing class of compounds. However, recent advances in the science of Immune Modulation Therapy have led to improvements in beta glucan and heteropolysaccharide chemistry, absorption and bioavailability, making **Immune Assist Micron Î** the most potent immune ingredient available in the world today, guaranteed. It is a combination of over 200 highly purified, immune-active High Molecular Weight (HMW) Heteropolysaccharides and Beta 1,3-1,6 triple right hand helix Beta Glucans. This product is not derived from brewers yeast, but rather from six closely related organisms. **Immune Assist Micron Î** is produced from the following 100% USDA Certified Organic, Certified Kosher, biotech lab cultivated, full spectrum, non-GMO medicinal mushroom species: *Agaricus blazei* - *Cordyceps sinensis* - *Grifola frondosa* - *Ganoderma lucidum* - *Coriolus [Trametes] versicolor* - *Lentinula edodes*. Each of these species offers slightly different polysaccharide structures, which activate many more types of immune cells than just simple beta glucans do. While the earlier yeast beta glucans activated only the Natural Killer (NK) cells, research shows **Immune Assist Micron Î** activates all 260 different classes of immune cells, including the NK cells, T-cells, Macrophages and many others. **Immune Assist Micron Î** is simply the most advanced breakthrough in immune science of the 21<sup>st</sup> century. Guaranteed!

- Studies show **Immune Assist Micron Î** to be 100% more bioavailable than yeast-derived beta glucan!
- **Immune Assist Micron™** is a combination of both water soluble heteropolysaccharides and HMW non-soluble triple helix beta glucans. It is fully micronized through a proprietary process to a maximum particle size of less than 40 microns, which makes it instantly absorbable. While yeast beta glucans are only 5 to 10% bioavailable in humans, **Immune Assist Micron Î** is virtually 100% bioavailable since the micronized absorption takes place so quickly that there is no breakdown of the active polysaccharides from contact with the stomach acid, as occurs with other beta glucan products.
- **Immune Assist Micron Î** is 100% Made in America, using no imported materials. It is Pure, Organic, Kosher, Patent-Protected and Unique. Using **Immune Assist Micron Î** as an ingredient in your next formulation will make your product stand out in the marketplace.
- Aloha Medicinals Inc. advanced GMP process makes your product verification and registration simple. All analytical information is provided by independent third party FDA registered labs, including genetic verification of all raw materials, and a comprehensive analytical breakdown of the finished product. Aloha Medicinals Inc is the largest producer of Organic Medicinal Mushrooms in the world today, and for a very good reason: Quality. In fact, Aloha Medicinals Inc. won the United States Department of Commerce "Exporter of the Year Award" for 2008. In 2009 we supplied dietary supplement raw materials to approximately 700 companies in 56 countries. We would love to supply the active ingredients for your next formulation. Immune Products are quickly becoming the most popular class of supplement, and with our product quality and technical support, your next immune formula will be the leader in your market segment. Together we can achieve greater success. What immune ingredients can we supply for you today?

**21<sup>st</sup> Century Science FOR TOMORROWS PRODUCTS !**
